Sext nuts and bolts

Handing:  
Non-handed

Material:  
Track- extruded aluminum, Arm- steel

Maximum Door Weight:  
330 lbs.

Notes:  
To maximize hinge life and assist in achieving ADA compliance, Hager recommends the use of anti-friction or ball bearing hinges with our door closer products.  
The recommended temperatures for prolonged closer use is between -40° F (-42° C) and 150° F (66° C)  
Any certified BHMA/ANSI A156.4 door closer, regardless of manufacturer, that is installed and adjusted based on ADA or other reduced opening force requirements may not provide sufficient power to reliably close and latch a door  
If arms are ordered separately, there will be a significant difference in price than if purchased with a closer as a complete assembly.  
See adders for more information (add the list price of the option to the list price of the closer and take standard discounts).  
Accessories may not be available in all finishes. Please contact Hager for availability and lead time.

Springs:  
One piece seamless steel spring tube
