INSTALLATION & ADJUSTMENT INSTRUCTIONS

(LEFT HAND SHOWN-RIGHT HAND OPPOSITE)
BEFORE INSTALLING THE ARM-TURN BACKCHECK SELECTOR (on back of closer) ALL THE WAY IN.

1. Adjust spring power to match door width as indicated by chart on page 1.
2. Select proper templating based on degree of opening /dead stop. The closer and arm holes must be located for same degree of opening/dead stop. Drill and or top mounting holes in door and head jamb.
3. Attach complete arm to closer as shown at left . Arm will be at about 30° angle to closer body. Fasten with arm shaft screw. The arm will appear to be in an incorrect position. This is to accommodate the pre-load required for parallel arm mounted door closers See Fig.2
4. Mount closer on door, using fasteners provided. NOTE: Arm will provide resistance.
5. Swing door open about 45°. Mount shoe to frame stop per proper templating. Be sure to install the "Fifth" screw. If Stop is not wide enough, use spacer block provided.
