Safety power supply 12V DC - 20W

## TECHNICAL SPECIFICATIONS

|                             |                                                            |
|-----------------------------|------------------------------------------------------------|
| Operating Voltage           | Primary voltage: 230V<br>Secondary voltage: 12V and 13V DC |
| Power                       | 20W                                                        |
| Depth Adjustability         | x                                                          |
| Materials Main Part(s)      | Aluminium<br>Resin Encapsulated Electronics                |
| Hours of Salt Spray Testing | 500                                                        |
| Years of Warranty           | 2                                                          |
