

ASSA ABLOY

TRIDENT™ TEL-210 / TEL-IAL

Multi-point locking for double doors

Secures paired openings where one door is active
and the other is inactive.

- Automatically locks when the door closes
- Resists prybar attacks
- For paired openings without a stationary mullion
- Optional exterior trims available

TRIDENT™ TEL-210

Multi-point deadbolt exit lock

ASSA ABLOY

Four-point locking with automatic re-locking and a battery-backup alarm. For new construction and retrofit installations.

TRIDENT TEL-210 is a self-relocking 4-point deadbolt exit lock (three moving, fixed hinge-side bolts) with a battery-powered alarm and paddle. Depressing the paddle retracts all deadbolts for one-motion exiting.

TRIDENT is locked automatically when door closes. Requires a door closer.

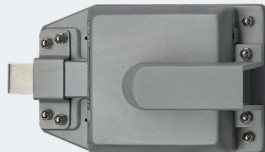

Alarm signal is generated when the paddle is depressed. An armored cable carries the wires across the door and is connected to a battery alarm system.

Elements

Hinge-side locking bolt

Stainless steel primary bolt

Stainless steel primary bolt strike

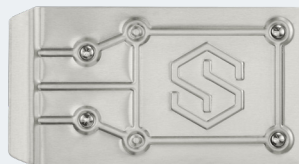

Upper and lower horizontal bolts

Aluminum paddle

Thru-bolt plates

Anti-pry plate

Optional exterior lever trims

TEL-KLT

Keyed lever trim, mechanical

TEL-KDT

Keyed lever trim with 24vDC release, fail-secure

TRIDENT™ TEL-IAL

Angled strike support and 2-point inactive leaf lock

ASSA ABLOY

TEL-IAL as a retrofit installation with a TRIDENT exit device.

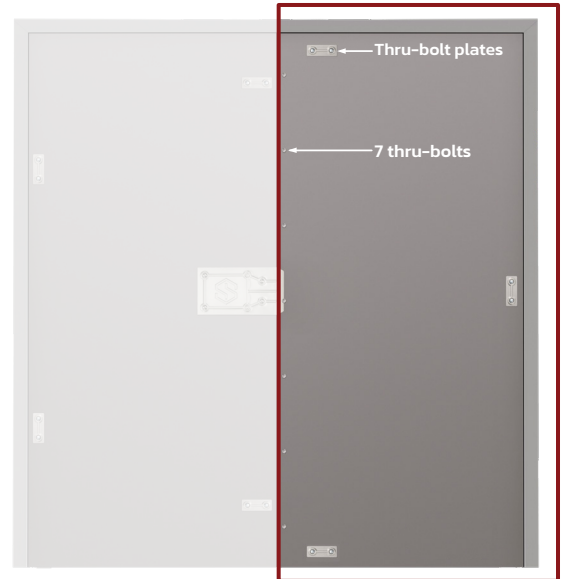

The TRIDENT strike is mounted on factory-prepared holes in the angled strike support. Holes for the top and bottom deadbolts are drilled into the angled strike support after the TRIDENT is installed.

- Either a TEL-100 or TEL-200 are installed on the active leaf of a pair of doors, depending on the application
- System includes an angled strike support that replicates the rabbeted frame overlap
- Resists prybar attacks, and provides mounting for the primary deadbolt strike and horizontal deadbolts.
- TEL-481 is a single-key, two-point lock designed for installation in under one hour.

Interior

Exterior

Inactive leaf

Active leaf

TEL-IAL Elements

TEL-DDA

Angled strike support

¼"-thick, angled aluminum, factory-prepared for main strike and seven thru-bolt locations

TEL-481

Two-point vertical deadbolt lock

Eliminates the need to bend down or operate separate floor slide bolts.

Allows top deadbolt to be engaged easily.

Both bolts project with a single turn of the key. No exterior control.

TEL-IAT Elements

TEL-DDA is used.

(Same model as TEL-IAL)

¼"-thick, angled aluminum, factory-prepared for main strike and seven thru-bolt locations.

TEL-482

Interior thumbturn replaces keyed operation on the inactive leaf, as used in the TEL-481.
